PALLETS**

Flexi AC StorMAX

Flexi AC StorMAX

Create up to 50% more warehouse capacity. Flexi AC StorMAX works by placing one pallet behind another from a very narrow aisle. This format maximises the storage capacity of any building.

Lift heights up to 11 metres

Every pallet load can be 1000 kgs or more. Even in the back space.

Integrated sideshifting and telescopic function with SCS

With unique Stability Control System (SCS), maximises capacity of back pallets throughout the system.

Uses modern Warehouse Management Systems (WMS)

(WMS) to control placement of loads in FILO order to maximise handling efficiency.

Fast work cycles

With only 50% of loads in back locations means 30% more pallets per hour per truck, than 'Drive In' racks / Shuttle Car Systems. Bottom pallets on floor for easy picking with PPT.

FLEXI AC STORMAX - 50% MORE PALLET

- Create up to 50% more warehouse capacity. Flexi AC STORMAX works by placing one pallet behind another from a very narrow aisle. This format maximises the storage capacity of any building.
- 50% of all pallet loads can be accessed single deep for faster throughput during low season.
- WMS can be programmed to place rear loads in FILO order to minimise housekeeping moves.
- All racks are low cost standard frames and beams
- Existing building, lights and floors can be reconfigured all low cost.
- Beats 'Drive In' and Block Shuttle systems on storage capacity and throughput.

TELESCOPIC FORKS

Two Deep integrated hydraulic forks smoothly place back pallet with minimum deflection.

SUPER ELASTIC TYRES

High Quality Continental super elastic tyres, finger treads for smooth running for extended service life.

HiVIS OVERHEAD GUARD

Unique cantilever laser pierced design maximises operator protection and upward visibility for class leading safe handling.

2.5 TONNE ARTICULATION UNIT

Developed to allow precision stacking to over 11 metres, combining 220° articulation with 2.5 tonne reliability.

UNIQUE "CLEAR VISION" MAST

Operators have excellent forward visibility thanks to the triplex free lift mast, with its twin side mounted lift cylinders. Mast tilt means easy fork entry into pallets - even on road trailers.

OPERATOR VISION SYSTEM

High definition LCD CCTV allows operator to stack safely up to 11 metres with minimum fatigue. Programmable lift height selection for fast stacking.

HIGH-BACK SEAT

Optional fully adjustable spring high-back seat with arm rests reduces fatigue on high lift heights.

EASY BATTERY CHANGE

Low rear lift off or roll off for fast changeovers. Good access for battery topping. No motors underneath.
